

LC-205 Glass-break and Shock sensor

Key Features

- Acoustic sensor
- Compatible with any hardwired control panel
- Case tamper
- Microphone sensitivity adjustment

The new LC-2xx line of hardwired detectors represents the ultimate choice for residential and industrial security installations.

LC-205 is an acoustic sensor able to detect glass breaking and shock.

The detector offers full flexibility, featuring 4 different operation modes, settable by built-in DIP switches. The desired operation mode can be set based on the environment the detector is installed in or required outcome:

- Shock sensor only
- Detection of door / window opening
- Dual LOW and HIGH frequency for best detection of all glass types breakage
- Normal glass breakage

Specifications

Acoustic sensor range	7 meters
Case tamper	Yes
Mounting	Direct on the wall
Power supply	13.8 Vdc
Current draw	19 mA
Dimensions	77 x 36 x 20 mm

Approvals

- CE

Johnson Controls

Johnson Controls is a global diversified technology and multi-industrial leader serving a wide range of customers in more than 150 countries. Our 120,000 employees create intelligent buildings, efficient energy solutions, integrated infrastructure and next generation transportation systems that work seamlessly together to deliver on the promise of smart cities and communities. Our commitment to sustainability dates back to our roots in 1885, with the invention of the first electric room thermostat.
